

Name: _____ Period: _____ Number: _____

1.1c Notes – Distribution and Collecting

Solve the following equation and JUSTIFY:

$$-28 = 6(x - 5) + 2(-5x - 1)$$

Solve the following equation and JUSTIFY:

$$-1 + 6(1 + 2r) = 5(3r + 7)$$

Name: _____ Period: _____ Number: _____

1.1c Notes – Distribution and Collecting

Solve the last equation you just did in a different way. You don't have to justify, just show that you'll get the same answer.

Solve this bad boy. Justify your solving. Have someone check their answer with yours, then if you're both right, have them sign the bottom.
