

Name: _____ Period: _____ Number: _____

Math 9 / 9H
CW 3.2/3.3a #1

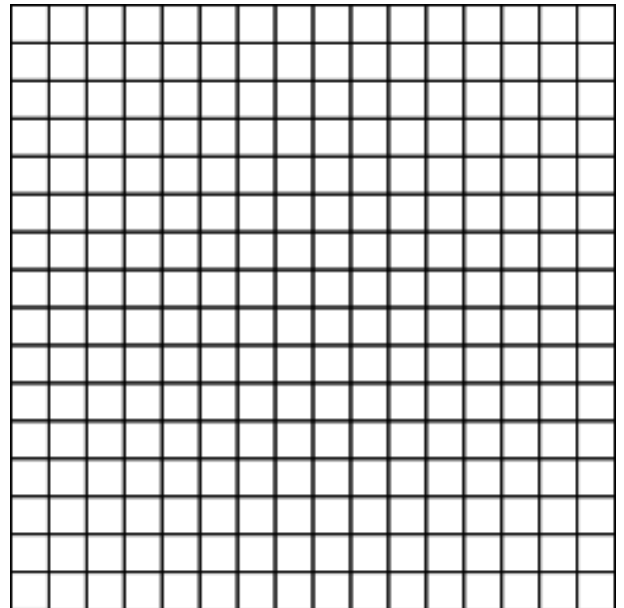

Miah was making some raisin tarts. Ever since she read about them in Mendy's class, she WANTED to make some – like supes bad. Her mom had already made some, but she had hid them – that made her slightly upset.

So, she started baking like crazy. After 15 min, there were 45 tarts total and in 36 min, there were 80 tarts total! Then a squatch came, threw water balloons at Miah, and ate all tarts. Even more upsetting.

Question is – can you come up with an equation to represent Kellen's baking skills?

Let's connect the story to a graph.

What does the slope MEAN?

Equation: _____

What does the y-intercept MEAN?
